ENDPOINT DETECTION & RESPONSE
PRODUCT OVERVIEW

INTRODUCING
ENDPOINT DETECTION & RESPONSE

The ever-growing threat of ransomware and other malicious malware-based attacks has proven that client protection solutions cannot be measured based only on endpoint compliance. Traditional antivirus technology uses a long-embattled signature-based approach, which has failed to match the pace of emerging malware and evasion techniques.

Additionally, with the proliferation of telecommuting, mobility and BYOD, there is a dire need to deliver consistent protection, application vulnerability intelligence, and web policy enforcement and more for endpoints anywhere. SonicWall Capture Client is a unified endpoint offering with multiple EPP and EDR capabilities.

WHY CHOOSE
CAPTURE CLIENT?

The **SonicWall Capture Client** offers best of breed, next-gen antivirus protection with built-in autonomous EDR. Not only does Capture Client excel in offering effective threat protection, the synergy with the SonicWall platform allows for increased visibility and protection both on and off network. Ensure your security is boundless with Capture Client's protection and centralized management.

SONICWALL®

Stop Attacks before execution

Protects against ransomware, known and unknown malware, memory exploits, and more.

Visibility into Vulnerabilities

See what applications are vulnerable, their severity and why.

Remediate & Rollback

Restore any data affected by an attack with unique Windows one-click rollback capabilities.

Discovering, quarantining, and removing undercover threats before they execute saves costly downtime and defends your reputation.

As companies face increasingly complex cyberthreats, as well as a greater diversity in the number and types of endpoints accessing the network, they need more help that endpoint detection and response solutions provide.
